V-CUBE™

the 21st century cube

www.v-cubes.com
www.v-games.eu

Introduction

The cleVer Cube that's changing the world of cubes!

Welcome to the world of V-CUBE™, the global innovation leader in rotational puzzle cubes.

V-CUBE™ products are a uniquely designed and constructed series of rotational cubes. They are manufactured under the unified V-CUBE™ technology, invented and patented worldwide by the Greek Engineer Panagiotis VERDES.

V-CUBE™ technology made possible the construction of a Cube with an unlimited number of layers, providing safe and smooth rotation. The revolutionary approach led to an innovative construction that permitted the production beyond five-layered cubes something that was believed to be unattainable for over 20 years!

At the same time, V-CUBE™ unified technology has led to the design & industrial production of much more durable and user friendly cubes of existing sizes and introduced the "pillow" cube design. Furthermore, V-CUBE™ innovative stylish approach to print directly on the cube's surface, introduces borderless creations of popular subjects and effectively explodes the Cube to an infinite level.

Our specialization in cube development has also generated several other products within the Games and Puzzles section, such as the amazing V-SPHERE™, the GENIUS WOOD™ Puzzle line, the innovative GRAVICUBE™ and our board games "ARTISANS™", "TRANGLAR™" and "TWINKLE™".

Our products are addressed to kids and parents, students and teachers, professionals and artists, tourists and museum lovers, companies and licensees. Their unique features combined with the stepping difficulty and the innovative concepts that they offer, allow literally everyone to enjoy them!

Genius Wood

Company history and information

The company was founded in 2008 and is located in the Korinthos prefecture of Southern Greece. Verdes Innovations S.A's vision is to provide to people worldwide an opportunity to extend their capabilities and develop pluralistic creative skills through the use of our innovative and educational series of puzzles.

The inventor of V-CUBE™ technology, Mr. Panagiotis VERDES, an inspired Greek Surveying Engineer, has been engaged in 3D constructions and designs for over 30 years.

Following years of innovative ideas and experiments, he has created the world's first 6x6x6 and 7x7x7 cube! Moreover, his invention, which includes a unified rotating mechanism for any sized cube, allows the construction of smooth & durable cubes of up to 11 layers, thus defying a worldwide belief that a sturdy construction of cubes of over 5 layers is impossible. His designs and invention has been awarded at International Competitions and by the Greek Ministry of Development.

Since then, the company has developed over 130 SKUs in the V-Classics and the V-Collections categories. Furthermore, has pioneered a series of personalized cubes offered to some of the most famous museums' gift shops worldwide, corporations, amusement parks and end customers.

Our specialization in cube's development has also generated several other products within the Games and Puzzles section, such as the amazing V-SPHERE™, the Genius Wood™ Puzzle line, the innovative GRAVICUBE™ and our games ARTISANS™, TRANGLAR™ and TWINKLE™.

VERDES Innovations S.A. consists of an R&D designing division, a production department, a marketing division, a logistic and a support department, of which all strive to provide the best quality control and customer service support possible. Our Management Systems have been certified on ISO 9001:2008 and 14001:2004 standards.

All contemporary, safety and high-tech standards are used in order to accommodate customers, including authorized V-CUBE™ dealers and cubers worldwide, so that they acquire our latest technology cube games efficiently and with all the necessary support. We have been recognised with several design and business awards for our products and innovations.

V-CUBE™ products have reached 114 countries in all five continents. A growing International network of distributors ensuring exceptional service and efficient product supply.

The inventor Mr. Panagiotis VERDES

PATENTS - IP

AWARDS

GRAVICUBE™

Powered by gravity- Solved by genius!

GraviCube™ is a groundbreaking gravity-powered 3D puzzle offering users a truly Innovative Mechanism and Addictive Fun!

The patented gravity-powered rotation system of GraviCube™ invented by Domokos Nagy, replaces traditional hand-twisting and the result is a dynamic, intuitive challenge that blends motion, rotation and visual logic never seen before in a handheld puzzle. This unique mechanical concept—combined with premium manufacturing standards—guarantees maximum user satisfaction and long-lasting engagement. With fully customizable faces, GraviCube™ becomes a powerful branding and storytelling platform—ideal for museums, souvenir shops, tourist destinations, and high-impact promotional campaigns.

GraviCube™ consists of six dual-layer image faces, each combining a fixed outer disk with a rotating inner disk containing fragments of the same artwork. Inside the cube, a free-moving metal ball activates the internal mechanism that rotates adjacent faces by 90° whenever the cube is tilted or turned. Users scramble the puzzle by tilting and turning the cube and then guide the ball to restore all six images. Every tilt is a fresh, smart, simple, stress-free, eye-catching and immersive experience suitable for every age and gender!

For puzzle lovers of all ages seeking: **QUALITY – SIMPLICITY– PRECISION**

Explore the GraviCube™ collection: four unique designs, one gravity powered experience!

GRAVICUBE™

A minimal, elegant design featuring a key-and-keyhole with gravity-themed elements. Rotate the discs to realign the shifting artwork and “lock” the image back into place.

EAN: 5206457003501

GRAVICUBE™ NEWTON

Colorful space illustrations of planets, rockets, and astronauts burst into motion when scrambled. Guide the ball to realign the images like a true space explorer.

EAN: 5206457003525

GRAVICUBE™ TIME

Each side shows a world landmark inside a clock displaying its local time. Scramble and solve while learning about global time zones and famous monuments.

EAN: 5206457003518

GRAVICUBE™ MAZE

Four neon paths weave across the cube, forming an interconnected multi-side maze. Use gravity to rebuild the continuous glowing lines after they break into fragments.

GRAVICUBE™ | THE PATENTED INNOVATIVE GRAVITY-POWERED PUZZLE!

V-Sphere™ | THE SLIDING SPHERICAL PUZZLE!

V-Games™ | "ARTISANS™" "TWINKLE™" "TRANGLAR™"

GENIUS WOOD™ | THE UNIQUE WOODEN PUZZLE LINE - ONLY A TRUE GENIUS CAN SOLVE THEM!

V-CUBE™ 3D rotational puzzle innovation incorporates the same superior mechanism for all cube sizes. V-Cube's unified mechanism is based on the cube's breakthrough conical internal design, which opens up new possibilities for endless expansion. The key is the simple but unique design of V-Cube's unified corner piece which reaches the appropriate depth in the cube's Interior and ensures the sturdy construction and the smooth rotation of all cube sizes. V-Cube is changing the world of cubes with a 21st century mechanism that raises the potential for rotational puzzles to an infinite level.

V-SPHERE™ is the worldwide patented sliding spherical 3D-puzzle. The V-Sphere's innovative nature will challenge, excite and amaze male and female people of every age. The "V-Sphere" is a light but sturdy puzzle with permanent vibrant colors and the smoothest sliding play you can ever imagine! The sophisticated puzzle concept combined with the highest European manufacturing quality, warrants the ultimate user satisfaction.

ARTISANS™ is a fast and exciting but challenging family card game for 2 to 4 players which lasts 30 to 45 minutes. Players are trying to develop their skills in the use of seven different materials: clay, metal, wood, stone, gold, glass and textiles in such a way so that their level of expertise in these materials grants them the necessary skills to craft beautiful Art objects.

TWINKLE™ is a fast-paced strategic family dice game for 1-4 stellar creators. Decorate the night sky using colorful dice as stars and Twinkle!

TRANGLAR™ is an exciting strategy game for 2 players with various, multi shaped, colored pieces that players are placing onto the board trying to cover the most area of it. It is a very easy to learn and straight forward game, but it can be really tricky and challenging!

GENIUS WOOD™ puzzles are the perfect blend of fun and learning for puzzle solvers of all ages! Crafted from high-quality wood, each puzzle piece is designed to be a beautiful addition to you desk while offering a satisfying challenge. GENIUS WOOD™ puzzles help develop problem-solving skills, hand-eye coordination and patience - all while having a blast together!

GRAVICUBE™ isn't just another twisty toy—it's a revolutionary 3D puzzle that uses gravity as its core mechanic. It introduces an entirely new approach to mechanical puzzles. Instead of twisting faces manually, gravity triggers the movements—creating dynamic, fluid rotations that will challenge the players' visual logic. GraviCube™ is patented worldwide, fully trademarked and precisely developed for a smooth play experience. It's premium quality and fully customizable faces create a high-touch toy with strong multi-channel retail and promo potential.

V-Classics

So innovative, that changed the world of cubes.

The cleVerCube that's fun, incredibly challenging and offers endless satisfaction to every user.

"Turning an 80's toy into an endless range of speed cubes."

For over **30 years**, the idea of creating a cube higher than 5 layers was just wishful thinking; a computer simulation on a screen. We made it happen!

Our company designed, patented and created a superior range of cubes known for its overall quality and aesthetics.

The **"V-Classics"** includes **16** different six colored cubes in a flat or in our unique **"pillow"** shape! A unique range that cubers love to use and compete and shoppers love to collect and display!!!

V-CUBE™ 3 KEYCHAIN

The ultimate cubers' keychain!

Fun & Functional

The small, portable rotating cube is fully functional and abides by the strict quality standards of the rest of our V-Cube range. Designed with smart precision, this fun accessory rotates smoothly, is easy to handle and super satisfying to solve. No stickers or added colors, this cube is made from colored plastic which ensures the best quality. You can hold the cube in your hand, put it in your pocket and even hold it together with your keys!

Much like the classic V-Cube™ 3, the Keychain V3 has 4.32×10^{19} possible permutations but weighs no more than 30g together with the chain! The mini-cube consists of 26 mini-cubies and a solid cross for supporting their independent rotation on based axes. Available in both the classic flat shape and our unique "pillow" shape.

Bright, smooth and fun, the V3 Keychain is satisfying to look at AND to solve making it an amazing accessory for everyone!

QUALITY - INNOVATION - CHALLENGE

V-SPHERE™

Scramble, Slide, Solve!

THE WORLDWIDE PATENTED SLIDING SPHERICAL PUZZLE HAS ARRIVED!

The V-Sphere™ is an amazing spherical sliding puzzle offering to the user Innovative Design, and Addictive Fun! It is a light but sturdy puzzle with permanent vibrant colors and the smoothest sliding play you can ever imagine! This sophisticated concept puzzle combined with the highest European manufacturing quality, warrants the ultimate user satisfaction.

V-Sphere™ consists of eight fixed colored spherical triangles. Seven of them are surrounded by twelve colored moveable rectangular pieces while the latter triangle is surrounded by eleven pieces always leaving a gap. This empty space enables the user to slide the moveable parts around the sphere. The goal of the puzzle is to match the colored, movable parts to the fixed triangles of the same color.

TRANGLAR

1.

**PLACE OR REPLACE
YOUR PIECES WISELY
ON THE BOARD**

2.

**TRAP & FLIP OVER
OR ATTACK YOUR
OPPONENT'S PIECES**

3.

**CONQUER
THE BOARD!**

**CONQUER THE BOARD USING
GEOMETRIC SHAPES !**

TRANGLAR™ is an exciting strategy game for 2 players with various, multi shaped, colored pieces that players are placing onto the board trying to cover the most area of it. It is an easy to learn and straight forward game, but really tricky and challenging to master.

TRANGLAR™ challenges both new and experienced players since the chances to win are 100% equal. It is also ideal for practicing geometry through a fun and educational process.

In most other similar games, shapes are used as puzzle pieces, but in TRANGLAR™ you wage war using geometrical shapes! The multi shaped dual-colored pieces, the various possibilities, the innovative game mechanics, it's very easy-to-learn rules and the strategy required can be seen in very few but classic and mass oriented games!

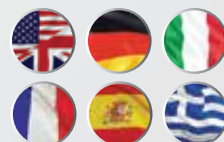

GAME COMPONENTS:

- 1 Plastic Game Board
- 42 Plastic game pieces (17 for each player, 8 neutral)
- Rulebook in 6 languages

ARTISANS

"A journey through Art and History"

Through the centuries, Artisans have been skilled workers, specialized craftsmen in creating art, functional or decorative objects. Sculptures, drawings, jewelry, clothes, constructions of different shapes and sizes. The work of Artisans has shaped the history of art and some creations have reached such worldwide fame; they influence even the modern world.

ARTISANS™ is a fast and exciting but challenging family card game for 2 to 4 players which lasts 30 to 45 minutes. Players are trying to develop their skills in the use of seven different materials: clay, metal, wood, stone, gold, glass and textiles in such a way so that their level of expertise in these materials grants them the necessary skills to craft beautiful Art objects. Embrace the role of an Artisan and let the beautiful artwork take you on a journey through art and history!

GAME COMPONENTS:

168 material cards, 9 Artisan cards, 24 art object cards, 1 first player token, 1 round tracker card, 1 wooden round tracker cube
