# Introduction

The cleVer Cube that's changing the world of cubes!

Welcome to the world of V-CUBE™, the global innovation leader in rotational puzzle cubes.

V-CUBE™ products are a uniquely designed and constructed series of rotational cubes. They are manufactured under the **unified V-CUBE™** technology, invented and patented worldwide by the Greek Engineer Panagiotis VERDES.

V-CUBE™ technology made possible the construction of a Cube with an unlimited number of layers, providing safe and smooth rotation. The revolutionary approach led to an innovative construction that permitted the production **beyond five-layered cubes** something that was believed to be **unattainable for over 20 years!**

At the same time, V-CUBE™ **unified technology** has resulted in the design & industrial production of much more durable and user friendly cubes of existing sizes and introduced the **"pillow"** cube design. Furthermore, V-CUBE™ innovative stylish approach to **print directly on the cube's surface** introduces **border-less** creations of popular subjects and effectively explodes the Cube to an infinite level.

Our specialization in cube's development has generated also several other products within the Games and Puzzles section, such as the amazing V-SPHERE™, our new games "ARTISANS™", "TRANGLAR™" and "TWINKLE™".

Our products are addressed to kids and parents, students and teachers, professionals and artists, tourists and museum lovers, companies and licensees. Their unique features combined with the stepping difficulty and the innovative concepts that they are offering, allow literally everyone to enjoy them!

**V-CUBE™**  
the 21<sup>st</sup> century cube

# Company history and information

The company was founded in 2008 and is located in the Korinthos prefecture of Southern Greece. Verdes Innovations S.A's vision is to provide to people worldwide an opportunity to extend their capabilities and develop pluralistic creative skills through the use of our innovative and educational series of puzzles.

The inventor of V-CUBE™ technology, Mr. Panagiotis VERDES, an inspired Greek Surveying Engineer, has been engaged in 3D constructions and designs for over 30 years.

Following years of innovative ideas and experiments, he has created the world's first 6x6x6 and 7x7x7 cube! Moreover, his invention, which includes a unified rotating mechanism for any sized cube, allows the construction of smooth & durables cubes of up to 11 layers, thus defying a worldwide belief that a sturdy construction of cubes of over 5 layers is impossible. His designs and invention has been awarded at International Competitions and by the Greek Ministry of Development. Our specialization in cube's development has generated also several other amazing V-SPHERE™, our new games "ARTISANS™", "TRANGLAR™" and "T

Since then, the company has developed over 130 SKUs in the V-Classics and the V-Collections categories. Furthermore, has pioneered a series of personalized cubes offered to some of the most famous museums' gift shops worldwide, corporations, amusement parks and end customers.

Our specialization in cube's development has generated also several other products within the Games and Puzzles section, such as the amazing V-SPHERE™, our new games "ARTISANS™", "TRANGLAR™" and "TWINKLE™".

VERDES Innovations S.A. consists of an R&D designing division, a production department, a marketing division, a logistic and a support department, of which all strive to provide the best quality control and customer service support possible. Our Management Systems have been certified on ISO 9001:2008 and 14001:2004 standards.

All contemporary, safety and high-tech standards are used in order to accommodate customers, including authorized V-CUBE™ dealers and cubers worldwide, so that they acquire our latest technology cube games efficiently and with all the necessary support. We have been recognised with several design and business awards for our products and innovations.

V-CUBE™ products have reached 114 countries in all five continents. A growing International network of distributors ensuring exceptional service and efficient product supply.

The inventor Mr. Panagiotis VERDES

## PATENTS - IP

V-CUBE™, V-Sphere™, Artisans™, Tranglar™ and Twinkle™ are worldwide registered trademarks of VERDES Innovations S.A. V-CUBE™ products and V-CUBE™ technology are also protected by the following National and International Patents in the name of Panagiotis Verdes.

## V-Sphere™

THE WORLDWIDE PATENTED SLIDING SPHERICAL PUZZLE HAS ARRIVED!

## V-Games™

"ARTISANS™" | "TRANGLAR™" | "TWINKLE™"

**V-CUBE™** 3D rotational puzzle innovation incorporates the same superior mechanism for all cube sizes. V-Cube's unified mechanism is based on the cube's breakthrough conical internal design, which opens up new possibilities for endless expansion. The key is the simple but unique design of V-Cube's unified corner piece which reaches the appropriate depth in the cube's Interior and ensures the sturdy construction and the smooth rotation of all cube sizes. V-Cube is changing the world of cubes with a 21st century mechanism that raises the potential for rotational puzzles to an infinite level.

**V-SPHERE™** is the worldwide patented sliding spherical 3D-puzzle. The V-Sphere's innovative nature will challenge, excite and amaze male and female people of every age. The "V-Sphere" is a light but sturdy puzzle with permanent vibrant colors and the smoothest sliding play you can ever imagine! The sophisticated puzzle concept combined with the highest European manufacturing quality, warrants the ultimate user satisfaction.

**ARTISANS™** is a fast and exciting but challenging family card game for 2 to 4 players which lasts 30 to 45 minutes. Players are trying to develop their skills in the use of seven different materials: clay, metal, wood, stone, gold, glass and textiles in such a way so that their level of expertise in these materials grants them the necessary skills to craft beautiful Art objects.

**TRANGLAR™** is an exciting strategy game for 2 players with various, multi shaped, colored pieces that players are placing onto the board trying to cover the most area of it. It is a very easy to learn and straight forward game, but it can be really tricky and challenging!

**TWINKLE™** is fast-paced strategic family dice game for 1-4 stellar creators. Decorate the night sky using colorful dice as stars and Twinkle!

# V-Classics

So innovative, that changed the world of cubes.

The cle**Ver**Cube that's fun, incredibly challenging and offers endless satisfaction to every user.

*"Turning an 80's toy into an endless range of speed cubes."*

For over **30 years**, the idea of creating a cube higher than 5 layers was just wishful thinking; a computer simulation on a screen. We made it happen! Our company designed, patented and created a superior range of cubes known for its overall quality and aesthetics.

The **"V-Classics"** includes **15** different six colored cubes in a flat or in our unique **"pillow"** shape! A unique range that cubers love to use and compete and shoppers love to collect and display!!!

# V-CUBE™ 2

## Beginner's Classic!

*Best cube for building consumer problem solving skills.*

V-CUBE™2 is the smallest version of the V-CUBE™ family and is available in two variations; the classical flat shape and the new, "essential" pillow-shaped version, derived from the original V-CUBE™7! Both of them have the same revolutionary V-CUBE™ mechanism and internal pieces!

V-CUBE™2 is a multicored, two-layered cube with exceptional quality and incredibly smooth rotation. The player is required to discover a strategy to achieve uniform colored sides on her/his V-CUBE™2.

V-CUBE™2 has almost 3.7 million possible permutations and weighs only 70g! It consists of 26 smaller pieces, 8 of them are the visible corners; and a solid cross that supports them, enabling them to rotate independently on based axes.

## V-CUBE™ 3

### The smoothest classic!

*Fast and incredibly smooth rotation.*

V-CUBE™3 is the 3x3x3 version of the V-CUBE™ family and is available in two variations; the classical flat shape and the new, "essential" pillow-shaped version, derived from the original V-CUBE™7! Both of them have the same revolutionary V-CUBE™ mechanism!

V-CUBE™3 is a multicored, three-layered cube with exceptional quality and incredibly smooth rotation. The player is required to discover a strategy to achieve uniform colored sides on her/his V-CUBE™3.

V-CUBE™3 has  $4.32 \cdot 10^{19}$  possible permutations and weighs only 96g! It consists of 26 smaller pieces and a solid cross that supports them, enabling them to rotate independently on based axes.

## V-CUBE™ 3 KEYCHAIN

The ultimate cubers' keychain!

*Fun & Functional.*

The small, portable rotating cube is fully functional and abides by the strict quality standards of the rest of our V-Cube range. Designed with smart precision, this fun accessory rotates smoothly, is easy to handle and super satisfying to solve. No stickers or added colors, this cube is made from colored plastic which ensures the best quality. You can hold the cube in your hand, put it in your pocket and even hold it together with your keys!

Much like the classic V-Cube™ 3, the Keychain V3 has  $4.32 \cdot 10^9$  possible permutations but weighs no more than 30g together with the chain! The mini-cube consists of 26 mini-cubies and a solid cross for supporting their independent rotation on based axes. Available in both the classic flat shape and our unique "pillow" shape.

Bright, smooth and fun, the V3 Keychain is satisfying to look at AND to solve making it an amazing accessory for everyone!

*"Decorate the night sky using colorfull dices"*

The board has 8 Starting Stars in four different colors. Each colored pair of stars corresponds to a player. These Stars are the entry points, where the players will begin to form their constellation, eventually placing a total of 7 dice and collecting victory points.

You may select 3 available dice of your choice. Roll them and connect one of them in your constellation. Alternatively, you may select and connect a D8 die directly to your constellation, without changing its initial value. You can either connect it with another dice or with a Starting Star, placing a connector between them. Every time you connect a die to another one it must always have a lower value. All Starting Stars and all dice in your constellation may be connected with up to 2 new dice.

If you achieve to connect a die to another one with less sides, keeping in mind that your new die's value must be lower, it will boost your score!

***Try to make your dice TWINKLE!***

The game ends when all the players have placed up to 7 dice in their constellations. Depending on their color, all dice have their own scoring method. Each method is depicted on the corresponding scoring card. The player who manages to combine and utilize them better, will earn more points and win the game!

The game also includes a set of 20 unique mission cards which can be combined with the basic scoring cards, enrich the player's decisions and multiply their strategic paths to victory.

**10 Bronze Missions:** they are competitive and give extra points to the one player that best fulfills the mission's criteria.

**10 Silver Missions:** can be accomplished multiple times by each player and give them extra points according to each card's ability.

 ES: Atrapa, voltea o ataca las piezas de tu oponente.  
 IT: Intrappola e gira oppure attacca i pezzi del tuo avversario.

**3.**

EN: Conquer the Board!  
 FR: Dominez le plateau de jeu !  
 DE: Erober die Spielfläche!  
 GR: Κατάκτησε το ταμπλό!  
 ES: ¡Conquista el tablero!  
 IT: Conquista il tabellone!

TRANGLAR™ is an abstract strategy game for 2 players with various, multi shaped, colored pieces that players are placing onto the board. It is a straightforward yet intelligent game, created to challenge both new and experienced gamers.

All the pieces of the game are made up of triangles. Each player tries to conquer the board using 17 colored pieces (blue and green) while there are also 8 neutral pieces (white) which could potentially help both players and change every game's plot. The aim of the game is to place as many game pieces of your color as possible on the board, such as by the end of the game you have more area of the board with your color on it.

To achieve this, you must place your pieces on the board in such a way that they are protected and as to take over your opponents' pieces by encircling them, attacking them and flipping them to your color!

TRANGLAR™ is ideal if you need 100% strategy with zero luck factor involved. It is also ideal for practicing geometry through a fun and educational process. In most other similar games, shapes are used as puzzle pieces, but not in this case! In TRANGLAR™ you wage war using geometrical shapes!

# “A journey through Art and History”

Artisans is a fast and exciting but challenging family card game for 2 to 4 players which lasts 30 to 45 minutes. Players are trying to develop their skills in the use of seven different materials: clay, metal, wood, stone, gold, glass and textiles in such a way so that their level of expertise in these materials grants them the necessary skills to craft beautiful Art objects.

The game is played in 12 rounds (the months of a year), where players are trying to craft Art objects and win victory points.

Use the material market to your benefit, claim the first player token in the right time to close the market and smartly manage your material cards in an effective way! The numerous combinations, the great replay ability, the strategic decisions and the challenging competition will leave anyone satisfied! Embrace the role of an Artisan and let the beautiful artwork take you on a journey through art and history!
